

What We Will Be Learning For The Week of Oct 26-29

Math	In math lessons at the start of the week the students will learn and practice a mental math strategy they can apply to their mental subtraction skills. Afterward they will spend time practicing their mental math skills while completing IXL activities, playing a collaborative math game, and while engaging in the interactive math prodigy online game.
Language	In language lessons this week the students will learn how to find the main idea and supporting details within a piece of non fiction text. The students will also be completing their October reading assessment on Raz-kids.com, and listen and respond to our ongoing class novel.
Unit of Inquiry	This week our students will be sharing the meals and snacks that they create for their 'day of healthy eating' activity. Students will share some of the food they chose and created on a group padlet, and discuss their experience of planning and eating their healthy meals. Later in the week students will also learn about the concept of cause and effect, and look at how it applies to the choices we make for our well being.
Reading	This week students will continue to be encouraged to read non-fiction texts for their independent reading. We will continue to use the Non-Fiction Choice Board, with new options being added this week for students to share what they've read and learned.

<p>Music: Learning Outcome: Students will understand that symbols can be used to represent sounds and that there is an internationally recognised system for doing this. Students will create and communicate rhythms using standard notation. Resources Needed: Devise, internet connection, white board, marker, pencils and paper</p> <p>Art: Learning Outcome: Students will inquire into the elements of art (texture, shape, color, form) Resources Needed: Sketchbook, collected papers (colored paper, magazine, gift wrap, etc), scissors, glue, coloring materials, recycled objects such as bottle caps, straws, plastic cutlery</p> <p>PE: Learning Outcome: The students will identify with basic movements and techniques required for running and jumping events in Athletics.
