

April 8, 2016

Dear KIS families,

Medical Partnership with International SOS Service (Thailand) Limited.

Please be informed that KIS is agreed to become partnership with International SOS Services (Thailand) Limited. This full service offered by International SOS will officially commence in the new academic year 2016/17 whereby the school will receive professional medical assistance from the team of medical networking worldwide. Seeing this partnership to fully start next year, the International SOS will offer its medical support to KIS in term 3 in order to understand and be familiar with the KIS community.

International SOS provides medical and security advice and assistance to organizations with international operations. Services include planning and preventive programme, in-country expertise and emergency response.

Therefore, starting in term 3, we will have a full-time paramedic nurse on site at the school nurse's office working from 7:30am-4:30pm to provide daily medical care and assist in any emergency cases to students on campus.

Please see a brief introduction and background of full time paramedic nurse from April 18th-June 8th below.

Mrs. Chonticha Komonsutti (Ying)
